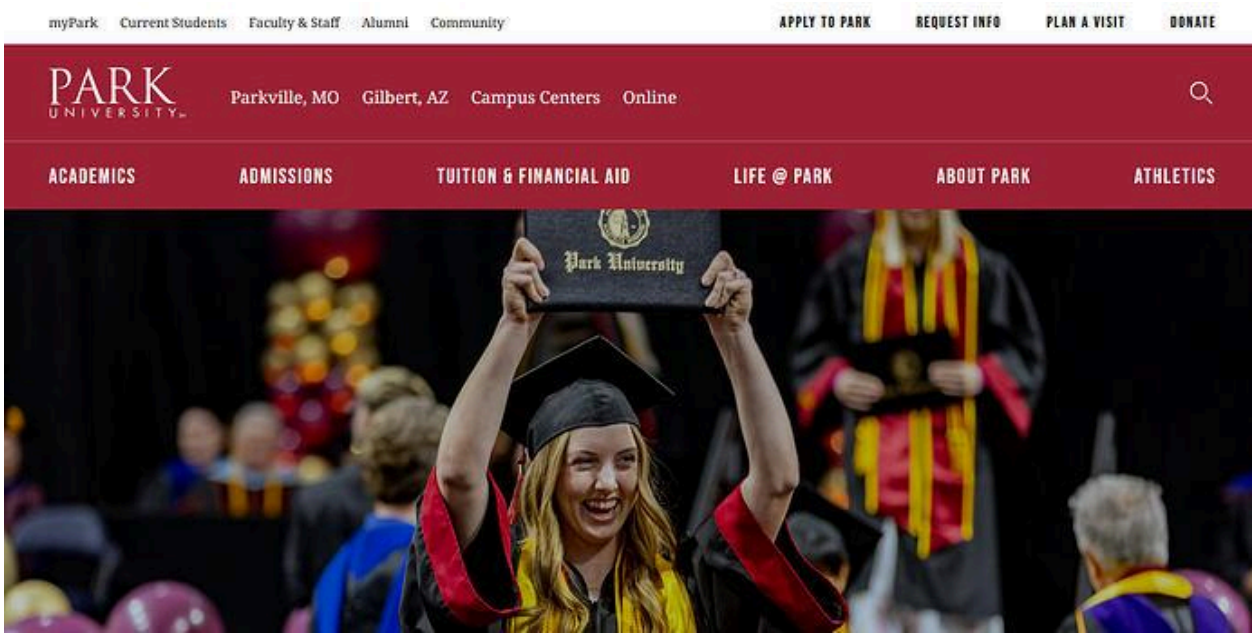
One online application. No fees. No enrollment costs. No US residency required.

Park University is a real, fully accredited US university (HLC-accredited since 1941). Their online certificate application process creates a genuine student account — and that account comes with a real `.park.edu` Gmail-powered email. Self-tested, still working in 2026.



🛠️ Prep First — Generate Everything Before You Open the Form

Don’t open the application until you have all of this ready. Copy it into a notepad. You’ll need it mid-form.

What You Need	Free Tool
Full US name + address + ZIP	fakeaddressgenerator.com — pick Texas, Florida, or Nevada (no state tax, cleaner geo)
US phone number	bestrandoms.com/random-phone-number — state-specific area codes
Random SSN	fakenamegenerator.com — generates full identity including SSN
High school CEEB code	Search built into the form — use your fake city, select any listed public school

🧠 Tricks — Platform by Platform

Amazon Prime — fastest claim, zero friction

Amazon's first step is just email verification — no SheerID, no document. Enter your `.park.edu` address at signup, click the verification link sent to that inbox, done. 6 months free starts instantly. No card required during trial. Cancel before it ends if you don't want to pay.

Microsoft 365 — domain auto-recognized

Go to microsoft.com/education/products/office, enter your `@park.edu` address. Microsoft recognizes Park's domain automatically. No upload, no extra steps. Full Office suite unlocks within minutes.

GitHub Student Pack — use Email 2 as your document

GitHub asks for enrollment proof. Your park.edu email satisfies the email check. If it asks for a document too — screenshot or PDF of Email 2 (the portal welcome email with your student ID) is accepted. Use the exact same name you registered with Park. Approval: 1–3 days.

SheerID (Spotify, JetBrains, Figma, Adobe) — two rules:

1. Use the exact name you registered with Park — SheerID cross-checks name against enrollment records. No variations. No nicknames.

2. Wait 24 hours after your `.park.edu` email activates before attempting SheerID verification. Park's enrollment takes time to propagate into SheerID's database. Attempting immediately = rejection. Waiting = instant approval.

UNiDAYS (Apple Music) — email loop verification

UNiDAYS sends a verification link to your `.park.edu` inbox. Click it. That's the whole verification. No documents needed. Log into gmail.park.edu to find the link.

Autodesk — most underrated claim

Full professional versions of AutoCAD, Maya, Fusion 360, 3ds Max — completely free for students. Just the `.park.edu` email + a simple enrollment form. No SheerID. One of the highest-value claims on this list.

Google AI Year — claim while it's open

Google's student AI bundle (Gemini 2.5 Pro, NotebookLM, Veo 3, 2TB storage, $200 value) requires a `.edu` sign-in. Check current offer window at edu.google.com — this one has a deadline, so claim early.

✅ Do's & 🚫 Don'ts

✅ Do	🚫 Don't
Log into my.park.edu + gmail.park.edu at least once after receiving Email 2	Let the account stay completely untouched after creation
Save both Park confirmation emails — they're your enrollment proof	Delete onboarding emails — you'll need them for GitHub and SheerID
Use the exact same name across ALL benefit claims	Use different name variations — SheerID will reject mismatches
Claim Tier 1 benefits the same day your email activates	Rush SheerID claims immediately — wait 24 hours first
Set a calendar reminder to cancel Amazon before 6-month trial ends	Forget — it auto-renews at full $14.99/month

Re-verify Spotify and Apple Music annually when they request it	Ignore reverification emails — your discount dies
Apply with a clean, stable IP	Apply with VPN on — inconsistent geolocation flags the application
Submit the form on a weekday	Submit late Friday — weekend processing is slower
Keep at least one login per month	Go months without any portal activity
